Week 3

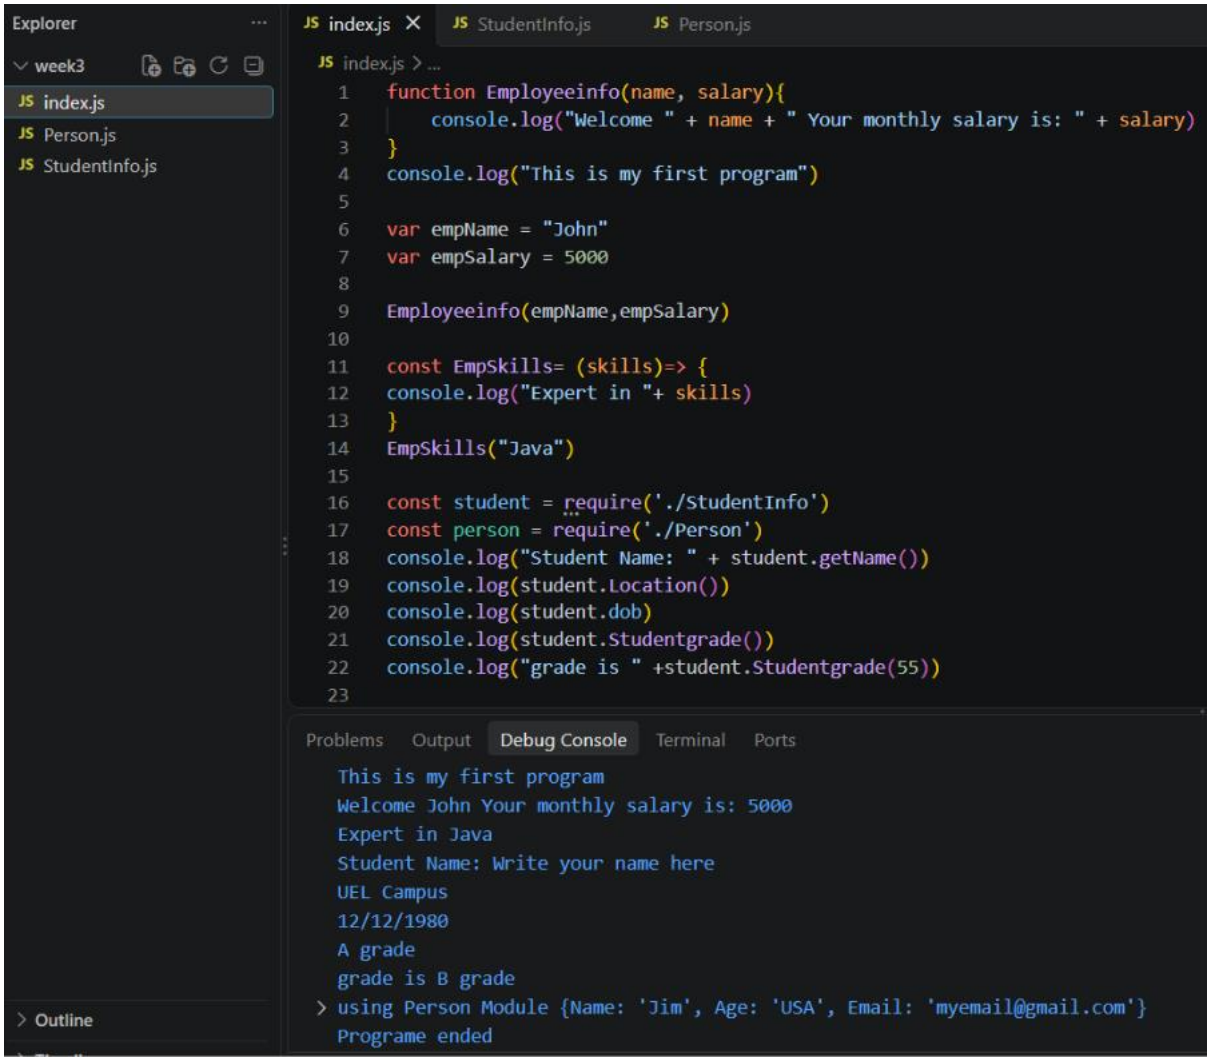

Exercise 1:

Exercise 2:

Welcome
index.js
index.js > ...
1 function Employeeinfo(name, salary){
2 console.log("Welcome " + name + " Your monthly salary is: " + salary)
3 }
4 console.log("This is my first program")
5
6 var empName = "John"
7 var empSalary = 5000
8
9 Employeeinfo(empName,empSalary)
10
11 const EmpSkills= (skills)=> {
12 console.log("Expert in "+ skills)
13 }
14 EmpSkills("Java")
Problems
Output
Debug Console
Terminal
Ports
C:\Program Files\nodejs\node.exe .\index.js
This is my first program
Welcome John Your monthly salary is: 5000
Expert in Java

Exercise 3 :

Explorer
week3
index.js
Person.js
StudentInfo.js
Outline
index.js
StudentInfo.js
Person.js
index.js > ...
1 function Employeeinfo(name, salary){
2 console.log("Welcome " + name + " Your monthly salary is: " + salary)
3 }
4 console.log("This is my first program")
5
6 var empName = "John"
7 var empSalary = 5000
8
9 Employeeinfo(empName,empSalary)
10
11 const EmpSkills= (skills)=> {
12 console.log("Expert in "+ skills)
13 }
14 EmpSkills("Java")
15
16 const student = require('./StudentInfo')
17 const person = require('./Person')
18 console.log("Student Name: " + student.getName())
19 console.log(student.Location())
20 console.log(student.dob)
21 console.log(student.Studentgrade())
22 console.log("grade is " +student.Studentgrade(55))
23
Problems
Output
Debug Console
Terminal
Ports
This is my first program
Welcome John Your monthly salary is: 5000
Expert in Java
Student Name: Write your name here
UEL Campus
12/12/1980
A grade
grade is B grade
using Person Module {Name: 'Jim', Age: 'USA', Email: 'myemail@gmail.com'}
Programe ended

Exercise 4:

Reflection:

This was a very practical and well taught lesson. I now know how to create variables, functions in other files and transfer and use them in another .js file which will be immensely useful. Not only that I also learned os. Commands which were very easy to use.
